Description

Data Integrity audits project a moving goal post. Issues that were top warning letter vote getters have made way for newer ones to include Cybersecurity etc. Our Data Integrity courses which are offered around the world are renowned for addressing such evolving trends. Consequently, they have attracted record attendances. Attendee feedback suggests the uniqueness of our offerings. Particularly significant is the feedback from those who attended similar courses offered by other companies.

Chinmoy Roy, our course instructor, is one of the world's first to design, implement and obtain "fit for use" certification for the world's largest paperless biologics manufacturing facility in the late 1990s. He is a practicing Data Integrity auditor. Former FDA inspectors include him on their 3rd party and mock audit teams. He also continues to provide consulting services in the design and implementation of Data Integrity infrastructures to major multinational companies. His lucid and pragmatic presentation style and interaction with the trainees/conference attendees, has earned him the "Speaker of the year" award from attendees of the world's prestigious conference on Data Integrity.

Areas Covered

- What is Data integrity
- Data Life Cycle design and controls
- Elements of a Data Integrity Assurance program
- Roles and responsibilities of different groups in ensuring data integrity
- What data integrity SOPs do auditors expect to see during audits
