Location : Boston, MA,
Boston, MA, US, ZIP: 10001

2018 SLAS Americas Sample Management Symposium: *Managing Samples from Bench to Clinic*

Mark your calendar for November 13-14, 2018, in Boston, MA, to attend a brand new event from SLAS — the **2018 SLAS Americas Sample Management Symposium: *Managing Samples from Bench to Clinic***. With a program curated by practicing sample management experts, this event will impart the latest education, case studies and best practice in sample management, with a focus on drug discovery processes.

Prevalent trends that will be addressed at the Symposium include:

- The rules of sample storage and management of samples are being rewritten — biological compounds and samples require the same attention and care previously paid only to small molecule libraries.
- Sample management groups increasingly support a growing array of human disease relevant assays and models.
- Quality programs and regulatory awareness are necessary when handling and providing samples in support of clinical studies and regulated bioanalysis.
- Ever-growing collaboration between academic, government and commercial institutions is forcing an increased emphasis on best practices for sharing samples. Learn how your organization should navigate this changing landscape

Read the [Letter from the Symposium Chair](#) Sue Holland Crimmin, Ph.D. GlaxoSmithKline, for additional details.

Benefits of Attending this Symposium:

- Network with sample management experts from Academic, Biotech, Pharma and Vendor communities.
- Opportunity to crowd source solutions to key challenges.
- Learn how to adapt best practice to different sample types.
- Benchmark your operation to those most effective and innovative
- Understand how organizations are harnessing new technology and innovation.
- Discuss up and coming key challenges in the regulatory, quality and compliance fields
- See examples of how people build successful collaboration and harness external resources.
- Showcase emerging key talent
- important recognition by presenting your work in a podium presentation or poster

Watch this site for additional event details as they are announced.
