

How software requirements are used in validation

Date : Jan 30, 2018 - 10:00 AM

Event URL : <http://www.BostonEventsList.com/events/how-software-requirements-are-used-in-validation-jan-2018>

Organizer : Netzealous LLC DBA - Compliance4All

Venue : online

Location : 161 Mission Falls Lane, Suite 216,,
Fremont, California, United States, ZIP: 94539
Phone: 8004479407

Ticket Price: One Dial-in One Attendee Price: \$150.00

Overview:

This course is NOT a programming course. We will discuss what must be done but will not discuss methods to execute necessary testing.

Why should you Attend:

Testing software to prove that it works and has no bugs is not sufficient to obtain FDA approval. There are additional requirements, analyses and tests that FDA feels are necessary to prevent user injuries.

Areas Covered in the Session:

Software Validation more than Testing
Requirements Traceability
Risk Analysis
Unit, Integration and System Testing
Algorithm Validation
Challenges to the Software
Configuration Management

Who Will Benefit:

Engineer

www.BostonEventsList.com

Engineer Management
Software Engineer
Programmer
Quality Assurance
Regulatory

Speaker Profile:

Edwin Waldbusser is a consultant retired from industry after 20 years in management of development of medical devices (5 patents). He has been consulting in the US and internationally in the areas of design control, risk analysis and software validation for the past 8 years.
