Overview:

Accreditation is not a guarantee of analytical competency. Getting accredited is just the beginning. The journey begins with defining the laboratory's operating principals and policies.

Why should you Attend:

Many laboratories struggle with developing and implementing a functional quality management system that not only complies with the management and technical requirements of ISO/IEC 17025:2005 but also meets their needs.

Areas Covered in the Session:

Defining a Quality Management System (QMS)
Management Components of a QMS
Technical Components of a QMS
Method Selection, Validation and Verification
Ensuring analytical competency

Who Will Benefit:

Laboratory owners and operators
Laboratory Managers
QA Managers
