

Live Webinar Understanding and Implementing a Technology Transfer Process

Date : Apr 17, 2018 - 01:00 PM - 02:00 PM

Event URL : <http://www.BostonEventsList.com/events/live-webinar-understanding-and-implementing-a-technology-transfer-process>

Organizer : conference Manager

Venue : online

Location : WCS Consulting Inc.3190 Stirling Rd, Unit K4 ,Hollywood, FL 33021,
Hollywood, FL, US, ZIP: 33021
Phone: 347 282-5400

Ticket Price: \$179 One Dial-in One Attendee | Corporate Live Recorded \$279 One Dial In - Max 10 attendees |Group \$399 Multiple locations upto 5 dial in | Recorded \$249

This training will introduce the concepts associated with implementing a carefully defined technical and business governance programs along with clearly defined R&D to site transfer steps for successful implementation. It will cover the concepts associated with transferring the scientific technology needed to manufacture the product, processes to ensure the receiving manufacturing facility is ready for the product and tools and templates to help capture the knowledge.

At the end of the session, you should be able to:

- Define technology transfer
- Identify elements of the business process framework for managing technology transfers
- Identify New Product transfer process
- Explain benefits of technology transfer
- Determine elements of a successful technology transfer

Why should you attend :

Successful transfer of pharmaceutical products and their processes is critical to the successful launch. Its success ensures that products of the highest quality are delivered to the patients along www.BostonEventsList.com

with meeting the business demands of the company. However execution of that transfer is complex involving the interactions of many disciplines across an organization. It depends both on the careful development, management, and transfer of technical and business knowledge along with the development of steps to define the formal transfer of that knowledge from R&D documents and systems to commercial manufacturing documents and systems.

Areas Covered

- The importance of technology transfer
- The use of a technical review system to update and review technology knowledge obtained during drug product development
- The use of a Product Strategy Review system to review important business aspects in preparation for transfer
- Tools and Templates used for technology transfer

Who will Benefit

- Senior quality managers
- Quality professionals
- Regulatory professionals
- Compliance professionals
- Production supervisors
- Manufacturing engineers
- Production engineers
- Process owners
- Quality engineers
- Quality auditors
- Development professionals
- Senior development managers

Speaker Profile

Expertise: Over 25 years of technical leadership experience in product development, process development, technology transfer, and process optimization. Skilled in taking new products from early laboratory stage to successful manufacturing launch. Expert in integrating Quality by Design and risk management into product development. Experience in establishing a Quality System for a R&D Quality Assurance organization.

Experience: Headed product development departments at Abbott Laboratories and AbbVie Inc. Leadership positions in numerous technical consortiums.
