Ticket Price: 0

Securing Business Critical Applications on Microsoft Azure

Join us in Burlington at the Microsoft Technology Center for an interactive discussion around common deployment scenarios and the different approaches you can take to protect your applications and data on Azure.

This is a hand-on seminar where we will:

- Protect and segment cloud workloads with an inline approach using the VM-Series Next generation firewall
- Take an API-based approach with Evident to achieve and maintain continuous security and compliance

www.BostonEventsList.com

- Deploy Traps for a workload-based approach to preventing zero-day attacks at the OS and application level
- Learn how automation can help embed security into your cloud application workflow

Pre-requisites:

- An existing Azure account
- PC with HTML 5 compatible browser

There will be food and drinks, colleagues, and many security experts to network with. Hope to see you there!
