The hotly anticipated B-Cell Directed Therapies for Autoimmune Diseases Virtual Summit is here to equip you with the expert insight and novel strategies to ensure the therapeutic and commercial success of the next generation of optimized B cell directed candidates.

Join us to shape the drug development fabric of B and plasma cell directed therapies and finally cater to the unmet clinical needs of patients with immune mediated and autoimmune diseases. With 24+ expert speakers - including Cabaletta Bio, Novartis, Pfizer, Biogen, Incyte; 18+ dedicated virtual sessions, and over 3 hours of facilitated video networking - this is your must-attend meeting to understand the interactions which make a combined epigenetic therapy and immunotherapy an attractive approach to circumvent the limitations of immunotherapy alone.
