Macrophage-directed Therapies Summit

Harnessing the Potential of Macrophage Therapies Using Small Molecule, Antibody & Cell Therapy based Approaches for Oncology and Beyond

Expert Speakers Include:

- Nicholas Parker**
Chief Scientific Officer
OHS
ImmunoTherapeutics
- Jeffrey Pollard**
Director of the Medical Research Council Centre for Reproductive Health, Professor of Resilience Biology
University of Edinburgh
- Jarmo Julkunen**
Chief Development Officer
Furon
Pharmaceuticals
- Michael Kichinsky**
Co-Founder & VP, Discovery
Carnus
Therapeutics
- Tamas Horvath**
Co-founder & Chief Scientific Officer
Yersine
Therapeutics

Industry Partner: **MYELCID**

With the explosive excitement and clinical proof of concept utilizing CD47 approaches, 2020 is the year for macrophage development, as we witness greater interest and investment in new work on novel macrophage targets outside of CD47.

The Macrophage-directed Therapies Summit is focused on optimizing the potential of macrophage therapies, through direct utilization of cells or small molecule approaches to target and stimulate macrophage cells in vivo for oncological indications and beyond.

Join us this October as the trailblazers of macrophage therapeutic development, from the likes of Carisma Therapeutics, Faron Pharmaceuticals, and Verseau Therapeutics come together to advance the fundamental understanding of macrophage biology, avoiding on-target toxicities and the emerging field of macrophage cellular immunotherapy.

Early booking and Academic discounts available - see website for more details.
