key learning objectives of the Topic

Attend this session by our expert speaker, Dr. Michael C. Redmond, and learn to audit ISO 27001 and Information/Cyber Security. Michael will help your organization to manage the security of the assets such as intellectual property, financial information, information or employee details entrusted to you by third parties through an effective auditing program that audits controls associated with the ISO 27001 standard. This session will enable you to gain knowledge and better audit information security management.
